## **Company Profile**

## **Industry-leading fire protection**

B&E was reestablished in 1997 to provide integrated fire protection services to Western Australia's construction industry.

Our holistic approach encompasses design, supply, install, project management and commissioning of fire protection systems for a seamless end-to-end solution.

Over the past two decades, our industry leading capabilities and consistently high standards have lead to rapid expansion and a reputation for premium outcomes.

Today, we count construction giants Hanssen and BGC amongst our network of long standing clients. The mutual trust we have built with our partners is the foundation of our ever-growing and diverse portfolio of successfully completed contracts, which includes large multi-storey towers, commercial offices, warehouses, medical and educational institution buildings.

### **Our Vision**

To be the best in class service provider of fire protection services in Western Australia.

## **Our Mission**

To provide a value-adding service through the provision of innovative, integrated fire protection services.

1

# Responsive, collaborative and efficient

Our fully qualified teams are skilled in every aspect of fire protection services including design, procurement, management, installation and commissioning.

Our culture of innovation and collaboration ensures we are at the forefront of the latest technology adoption and training.

Our values guide the way we work and commit us to providing our clients with best-for-project solutions.

## The values that guide us

#### Commercial

We look to deliver the best quality, innovative design solution.

#### **Professional**

We deliver a high level of service and are professional, always.

#### **Progressive**

We are early adopters of industry leading systems and are constantly improving.

#### Integrity

What we say, we do. We care.

## **Our Difference**

## **Insight for optimised projects**

#### Privately owned and incredibly agile.

We have a deep understanding of the technical aspects of both the design and construction stages, and draw on this insight to deliver optimised solutions.

Our designers are some of the only industry qualified fire protection designers in Australia. This technical expertise is an invaluable resource throughout the design and construction phase, providing B&E with a clear competitive edge.

Our service encompasses the full spectrum of fire protection services: design, supply, install, project management and commissioning.

With a reputation for quality and reliability, and as one of the only companies in Australia with industry qualified fire protection designers, clients trust us to deliver exceptional results.

#### **Our services**

- Fire pump and tank installations
- Fire protection project management
- Shop and office sprinkler fit-outs
- Hydrant and hose installations
- Automatic fire sprinkler systems
- High hazard warehouse sprinkler systems
- Thermal and smoke detection systems
- Emergency Warning & Intercommunication Systems (EWIS)
- Fixed and portable fire extinguishers

## Diverse experience

Our experience is diverse, covering a range of sectors including commercial, retail, health, education, residential and industrial fire protection projects comprising high-rise apartment buildings, aged care facilities and industrial warehouses.

We take pride in our workmanship, understanding the critical nature of our work and the role it plays in the protection of people and the environment.

Our OHS plans, risk management, emergency procedures and insurances all comply with the requirements of commercial and government tenders.

## What we bring

- Innovative, solution-driven design and construct
- Industry qualified fire protection designers
- Latest design software including REVIT
- Quality control project managers and design team work closely with other trades for quality and scheduling control
- Teams skilled in multiple equipment and system design

## Safety & Quality

## **Beyond compliance**

Guided by our values, we are committed to providing a safe, professional and ethical service to our clients.

We value communication and transparency, working collaboratively internally and with our clients.

# Safety is always at the forefront

Safety takes unconditional priority. Our comprehensive system is embedded in our approach to every project.

## **Quality management**

Quality is backed by formalised strategies, systems and procedures. We value training to ensure our standards of workmanship are upheld.

Our OHS plans, risk management, emergency procedures and insurances all comply with the requirements of commercial and government tenders.

Our staff has multiple qualifications and disciplines including:

- Using the latest software design
- Working to minimal variations
- Innovative research and design
- Computer aided drafting
- Cost effective procurement
- Project management
- Supply and install
- Commissioning
- OHS
- Risk management
- Working to building codes and Australian standards

## **Community**

## **Support and participation**

Locally owned, we are proud to support the communities in which we operate.

Since 2019, we have supported the Trigg Island Surf Life Saving Club as a gold sponsor. Our funding assists the club in purchasing new all-terrain vehicles and inflatable rescue boats as well as running an Immigrant Beach Awareness Program, to help make our beaches safer for all attending.

# Regulations and industry bodies

We are members of relevant industry bodies such as the National Fire Industry Association (NFIA) and Fire Protection Association Australia (FPA) and keep abreast of the latest regulations and innovations, ensuring the best outcome for our clients and community.
